

CAREER OBJECTIVE

Software Engineer with experience building and operating backend services, APIs, and data platforms in production environments. Hands-on with Node.js, Python, AWS, Docker, and distributed systems. Experience working in Agile teams, designing REST APIs, optimizing data pipelines, and improving observability. Currently focused on scalable API platforms, web-development, and cloud-native systems. Graduate of National Institute of Technology, Warangal in 2023 with a B.Tech degree in Computer Science. Interests are in Backend development, MERN Stack Engineering and Software Development.

TECHNICAL SKILLS

- Languages : Python, Java, C++, JavaScript
- Backend & APIs : Node.js, Express, REST APIs, OpenAPI (basic), API versioning
- Cloud & Infra : AWS (Lambda, EC2), Docker, Linux
- Auth & Security : JWT-based auth, API keys, role-based access (RBAC), basic OAuth concepts
- Data & Streaming: PostgreSQL, MongoDB, Redis, Airflow
- Dev Tooling : Git, GitHub Copilot, Postman, Cursor, Linux, WSL

WORK EXPERIENCE

Software Developer

Prezent AI

March 2025 – Present

Bangalore, Karnataka/Hybrid

- Performing the role of software developer at Prezent AI.
- Working on web development with VueJS.
- Built and maintained backend services using Node.js and AWS (Lambda, EC2) in a production AI platform.
- Designed and consumed REST APIs for data retrieval, processing, and frontend integration.
- Worked on API performance optimization and database query tuning to reduce latency.
- Collaborated in Agile sprints, handling deployments, bug fixes, and production issues.
- Implemented authentication flows using tokens/API keys for internal services.
- Gained hands-on experience operating services in cloud environments and planning changes.

Data Engineer

Rapido

July 2023 – September 2024

Bangalore, Karnataka

- Performed the role of data engineer at Rapido.
- Developed backend services and internal platforms using Node.js and Next.js.
- Built and maintained workflow automation using Apache Airflow for production pipelines.
- Refactored legacy repositories to improve reliability, readability, and deployment safety.
- Worked on API-driven experimentation platforms used by multiple internal teams.
- Improved observability of jobs and services through logs, metrics, and alerts.
- Collaborated cross-functionally using Git-based workflows and Agile practices.

API & PLATFORM EXPERIENCE

- Designed REST APIs with clear request/response schemas and versioning considerations.
- Worked with OpenAI-style JSON request/response patterns for AI-driven features.
- Implemented rate-limiting and access control using API keys and middleware.
- Familiar with OAuth2 flows, token-based authentication, and per-user authorization concepts.
- Experience deploying and operating services with Docker and AWS.
- Understanding of trace propagation, logs, and metrics for debugging distributed systems.

INTERNSHIPS

Penetration Tester

Cybsec, NIT Warangal

Apr 2020 – Apr 2023

NIT Warangal, Telengana

- Learned the basics of cybersecurity and red team pen-testing.
- Responsible for hosting CTFs in college.
- Took part in CTFs on behalf of the college as part of the club.

Public Relations

Innovation Garage, NIT Warangal

March 2020 – March 2022

NIT Warangal, Telengana

- Talked to companies to host webinars or workshops on campus.
- Edited and managed creative content published by the club.
- Played an integral role in the management of club activities to engage fellow classmates.

EDUCATION

National Institute of Technology, Warangal

B.Tech in Computer Science and Engineering

Kazipet, Warangal, India

August 2019 - June 2023

Our Own English High School, Sharjah, UAE

GRADE XII

Sharjah, UAE

April 2018 - March 2019

Our Own English High School, Sharjah, UAE

GRADE X

Sharjah, UAE

April 2016 - March 2017

PROJECTS AND SKILLS

DATABASE MANAGEMENT PROJECT

PostgreSQL, HTML, CSS, JavaScript

- Traffic Violation Database- Created an ER diagram for proper maintenance of all traffic systems of a particular city and implemented the database in PostgreSQL.
- Developed as a part of a team for college project.

CONSUMER FRIENDLY POS SYSTEM

Node.js, Express, ReactJS, MongoDB, API

- Developed a full stack project in ReactJS and using MongoDB for backend for consumer-centric sales POS System.
- Implemented API handling.
- Developed as a part of a team for a college project.

SOCKET BASED CHAT APP

Node.js, Express, ReactJS, API

- Developed a full stack project in ReactJS for a socket-based chat application with no local storage.
- Developed mainly to learn end-to-end socket-based communication.

COURSES COMPLETED

- Data Structures and Algorithms
- Database Management System
- Design and Analysis of Algorithms
- Object Oriented Programming
- Computer Networks
- Machine Learning
- Operating Systems

DECLARATION

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear responsibility for the correctness of the same.
